

Did you ever wonder...

- Why do some vehicles show a lot of damage and some only show minimal damage in the same type of impact?
- Can the final repair bill tell you a better story of collision damage than the original estimate?
- Could the body shop help with telling a more complete story about the collision damage?
- Why is the original estimate normally less than the actual cost to repair a vehicle?
- Is there a different approach to finding the actual cost to repair?
- Do some vehicles “hide” collision damage?
- Is there a way that the real and true damage could be documented and explained in a way that could be understood by the average person?

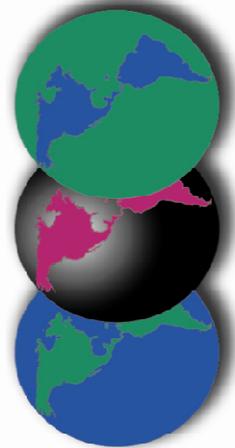

If you answered “Yes” to any of these questions then you need:

FutureForensics™
Automotive Damage Investigations

WHY?

FUTURE FORENSICS was founded in 1997 by Mark Olson. After being on all sides of the collision repair industry including insurance, repair, and education, it became obvious that a clearer understanding of how cars are damaged in collisions and how to document that damage was becoming more important to all parties involved.

FUTURE FORENSICS specializes in individual case-by-case investigations, Vehicle Valuation, Diminished Value evaluations, expert witness testimony and educational seminars dedicated to the *Truth* in collision damage.

What does ***FutureForensics*** offer?

We offer many different approaches to proving collision damage:

FORENSIC EVALUATION:

Gives you the straight facts on the vehicle and complete damages to it.

Forensic Evaluation includes:

- Estimated cost to repair, or analysis of existing written estimate
- Forensic documentation (narrative report of the written estimate and damage travel)
- Vehicle profile: type, construction and collision characteristics specific to the subject vehicle
- Pertinent vehicle photographs
- Minor amount of vehicle teardown if necessary (most vehicles will require some tear down)

POST REPAIR VERIFICATION:

A review of the pertinent repair documents and a visual inspection to verify the repairs were completed within industry accepted standards.

DIMINISHED VALUE:

Calculation and written report of inherent diminished value after a collision

VEHICLE VALUE APPRAISAL:

Vehicle value determination.

INDIVIDUAL CASE CONSULTING:

Free form, billed hourly

EXPERT WITNESS

SEMINARS & EDUCATION
